AUTO WORKSHOP ERP

Manager User Manual

This manual covers all features and functions available to the Manager role in FormationX ERP.

FormationX ERP — Auto Workshop Management System

Version 3.0 | June 2026

Contents

1. [Getting Started](#)
2. [Managing Customers](#)
3. [Jobs — Workshop Workflow](#)
4. [Inventory & Purchase Orders](#)
5. [Invoices & Payments](#)
6. [Reports & Analytics](#)

1. Getting Started

As a Manager, you can access all operational features including Customers, Suppliers, Inventory, Jobs, Purchase Orders, Invoices, and Reports. You cannot access system Settings or manage user accounts.

Logging In

Step 1: Open the FormationX application in your web browser.

Step 2: Enter the email and password provided by your Administrator.

Step 3: Click "Sign In" to access the dashboard.

Your Dashboard

The dashboard shows Total Revenue, Outstanding Invoices, Active Jobs, Low Stock Alerts, and Gross Profit. Use this to get a quick overview of workshop performance.

2. Managing Customers

Navigate to Customers from the sidebar. You can add, edit, search, filter, export, and delete customer records.

Adding a Customer

Step 1: Click "+ Add Customer" in the top right.

Step 2: Fill in First Name, Last Name, and Email (required).

Step 3: Use the address search to find and auto-fill suburb, postcode, and state.

Step 4: Click "Create Customer".

Tip: You can export customer data as CSV by clicking the Export button.

3. Jobs — Workshop Workflow

Jobs are the primary workflow. Each job tracks work on a customer's vehicle, including parts used and labour performed.

Creating a Job

Step 1: Go to Jobs > "+ New Job".

Step 2: Search for a customer or create a new one inline.

Step 3: Enter vehicle details (Make, Model, Year, Rego).

Step 4: Add parts from inventory and labour lines (presets or custom).

Step 5: Save as Draft, then update to "In Progress" when work begins.

Completing a Job

Click "Complete & Invoice" to finalise. This deducts parts from stock, generates an invoice, and sends it to the customer. This action cannot be undone.

Important: Double-check all parts and labour before completing — invoiced jobs cannot be edited.

4. Inventory & Purchase Orders

Inventory

The Inventory page shows all parts with stock levels, costs, and retail prices. Items are colour-coded: green (In Stock), amber (Low Stock), red (Out of Stock). Filter by stock status or category.

Purchase Orders

Create purchase orders to restock from suppliers. When stock arrives, change the PO status to "Received" to automatically update inventory quantities.

5. Invoices & Payments

View all invoices, record payments, send/resend to customers, and track overdue invoices.

Recording a Payment

Step 1: Click the credit card icon on an unpaid invoice.

Step 2: Enter payment amount, method, and reference.

Step 3: Click "Record Payment".

Invoices automatically change to "Paid" when the full balance is received.

6. Reports & Analytics

Access Reports from the sidebar. Available reports:

- Jobs Report — Revenue trends, job volume, average job value.
- Inventory Report — Stock levels, valuation by category.
- Customer Report — Top customers by spend.
- Supplier Report — Products supplied per vendor.
- Financial Summary — Total billed, collected, receivable, estimated profit.
- Job Completion — Completion rates and status breakdown.

Tip: Use reports to identify low-performing areas and track workshop efficiency.
