AUTO WORKSHOP ERP

Staff User Manual

This manual covers all features and functions available to the Staff role in FormationX ERP.

FormationX ERP — Auto Workshop Management System

Version 3.0 | June 2026

Contents

1. [Getting Started](#)
2. [Working with Customers](#)
3. [Creating & Managing Jobs](#)
4. [Checking Inventory](#)
5. [Viewing Invoices](#)

1. Getting Started

As a Staff member, you can work with Customers, Jobs, Inventory, and Invoices. This covers the day-to-day workshop operations you need to do your job.

Logging In

Step 1: Open the FormationX application in your web browser.

Step 2: Enter the email and password given to you by your manager or administrator.

Step 3: Click "Sign In".

You will see the Dashboard with key workshop metrics. The sidebar shows only the pages you have access to.

Tip: If you need access to a feature you can't see, ask your Administrator to update your role.

2. Working with Customers

Navigate to Customers to view, search, add, and edit customer records.

Adding a New Customer

Step 1: Click "+ Add Customer".

Step 2: Enter First Name, Last Name, and Email.

Step 3: Fill in the address using the search field — type a suburb and select from the dropdown.

Step 4: Click "Create Customer".

You can also create customers automatically when creating a new job.

3. Creating & Managing Jobs

Jobs are the main thing you'll work with. Each job tracks the work done on a customer's vehicle.

Creating a New Job

Step 1: Go to Jobs and click "+ New Job".

Step 2: Type the customer's name in the search field. Select them from the list, or click "Create new customer" if they're new.

Step 3: Enter the vehicle: Make (e.g. Toyota), Model (e.g. Camry), Year (e.g. 2022), Rego (e.g. ABC123).

Step 4: Describe what the customer needs (e.g. "Full service + brake check").

Step 5: Add parts: click "+ Add Part", select from inventory, and the price fills in automatically.

Step 6: Add labour: pick a preset service from the dropdown (e.g. Full Service, Oil Change) or click "+ Custom" for a custom line.

Step 7: Click "Create Job". It saves as a Draft.

Job Status Flow

- Draft — Job is created but work hasn't started.
- In Progress — Work is underway. Update parts/labour as you go.
- Completed — Work is finished. Ready to invoice.
- Invoiced — Invoice has been generated and sent to customer.

Completing a Job

When the work is done and all parts/labour are entered, click "Complete & Invoice". This generates the invoice and deducts parts from stock automatically.

Important: Make sure everything is correct before completing — you cannot edit an invoiced job.

4. Checking Inventory

The Inventory page shows all parts in stock. Use this to check availability before starting a job.

Understanding Stock Status

- Green (In Stock) — Enough stock available.
- Amber (Low Stock) — Running low, may need to reorder.
- Red (Out of Stock) — None available. Check Purchase Orders for incoming stock.

You can add new inventory items and edit existing ones. Use the search and filter to find parts quickly.

Tip: If a part is out of stock, let your manager know so they can create a Purchase Order.

5. Viewing Invoices

You can view invoices and record payments. Invoices are usually generated automatically from completed jobs.

Recording a Payment

Step 1: Find the invoice in the list and click the credit card icon.

Step 2: Enter the amount, select the payment method, and add a reference if applicable.

Step 3: Click "Record Payment".

The invoice status changes to "Paid" once the full amount is received.
