AUTO WORKSHOP ERP

User Manual

All Roles — Quick Reference Guide

This manual covers how to use FormationX ERP for each user role: Administrator, Manager, Staff, and View Only.

Version 3.0 | June 2026

1. Getting Started

FormationX is a workshop management system for auto mechanics. It handles customers, jobs, parts, invoicing, and reporting.

Logging In

1. Open FormationX in your browser (the URL provided by your administrator).
2. Enter your email and password, then click "Sign In".
3. You'll see the Dashboard with key workshop metrics.

Tip: If you can't log in, ask your Administrator to check your account in Settings > User Management.

Navigation

The sidebar on the left shows the pages available to your role. Click any item to navigate. The top bar has a search field, dark mode toggle, quick-add menu (+), and notifications.

Roles & Access

Administrator — Full access — all features, settings, and user management.

Manager — Operations + reports — cannot change settings or manage users.

Staff — Day-to-day — customers, jobs, inventory, invoices only.

View Only — Dashboard and reports — read-only, no editing.

2. Customers

The Customers page stores all client records. Search, filter by status, and export as CSV.

Adding a Customer

1. Click "+ Add Customer".
2. Enter name, email, phone, and company (if applicable).
3. Use the address search — type a suburb to auto-fill postcode and state.
4. Click "Create Customer".

Tip: Customers are also created automatically when you start a new Job with a name that doesn't exist yet.

Editing & Deleting

Click the pencil icon to edit, or the trash icon to delete. The system warns you if the customer has linked jobs or invoices before deleting.

3. Jobs — Workshop Workflow

Jobs are the core of FormationX. Each job represents work on a customer's vehicle, tracking parts used and labour performed.

Creating a Job

1. Go to Jobs > "+ New Job".
2. Search for a customer or click "Create new customer" for a walk-in.
3. Enter vehicle details: Make, Model, Year, Rego.
4. Describe the work needed.
5. Add parts — select from inventory, prices auto-fill.
6. Add labour — pick a preset (Full Service, Brake Replacement, etc.) or click "+ Custom".
7. Click "Create Job" to save.

Job Status Flow

- Draft — Created, work not started.
- In Progress — Work underway. Update parts/labour as you go.
- Completed — Work finished, ready to invoice.
- Invoiced — Invoice generated and sent.

Complete & Invoice (One Click)

When the job is done, click "Complete & Invoice". This single button:

- Deducts all parts from inventory.
- Generates an invoice with parts + labour + GST.
- Sends the invoice via email/SMS (if configured).

Important: Check all parts and labour before completing — invoiced jobs cannot be edited.

4. Inventory

Track all parts and supplies. Items show stock level, cost price, retail price, and supplier.

Stock Status

- Green (In Stock) — Sufficient quantity.
- Amber (Low Stock) — Below reorder level.
- Red (Out of Stock) — Zero quantity. Check Purchase Orders for incoming stock.

Adding a Part

1. Click "+ Add Item".
2. Enter SKU, name, category, supplier, cost price, retail price, quantity, and reorder level.
3. Click "Create Item".

Tip: Stock is deducted automatically when jobs are completed. Stock increases when Purchase Orders are received.

5. Purchase Orders

Use Purchase Orders to restock parts from suppliers.

Creating a Purchase Order

1. Go to Purchase Orders > "+ New Purchase Order".
2. Select a supplier, add items (cost prices auto-fill), set expected delivery date.
3. Click "Create Purchase Order".

Receiving Stock

When a delivery arrives, edit the PO and change status to "Received". Inventory quantities update automatically.

6. Invoices & Payments

Invoices are generated automatically from completed jobs, or can be created manually.

Recording a Payment

1. Click the credit card icon next to an unpaid invoice.
2. Enter amount, date, method (Card/Cash/Bank Transfer/Cheque), and reference.
3. Click "Record Payment". Status changes to "Paid" when balance reaches zero.

Sending & Resending

Click the paper plane icon to send an invoice via email/SMS. View send history via the clock icon.

7. Reports

Available to Administrator, Manager, and View Only roles.

Available Reports

- Jobs Report — Revenue, job count, average value, status chart.
- Inventory Report — Stock levels, cost/retail valuation by category.
- Customer Report — Top customers by total spend.
- Supplier Report — Products supplied per vendor.
- Financial Summary — Billed vs collected, receivable, gross profit.
- Job Completion — Completion rates and status breakdown.

8. Settings (Administrator Only)

Only Administrators can access Settings.

Key Configuration Areas

- Company Profile — Business name, ABN, contact details, address.
- Invoice Settings — Prefix, next number, default payment terms.
- Tax Settings — GST rate.
- Email & SMS — Configure EmailJS and Textbelt for invoice sending.
- Google Maps — API key for street-level address autocomplete.
- User Management — Create, edit roles, reset passwords, delete users.
- Data Management — Export/import backups, reset to demo data.

Managing Users

1. Go to Settings > User Management.
2. Click "Invite User" to create a new account.
3. Use the role dropdown to change access levels.
4. Click the key icon to reset passwords.

Important: Role changes take effect immediately.
